# How to read your electric or gas meter

- Read your meter from RIGHT to LEFT. Note each number before moving to the next dial on the left.
- Always read in the direction of 0, 1, 2, 3, 4, etc.
- Record the number the pointer has just passed.
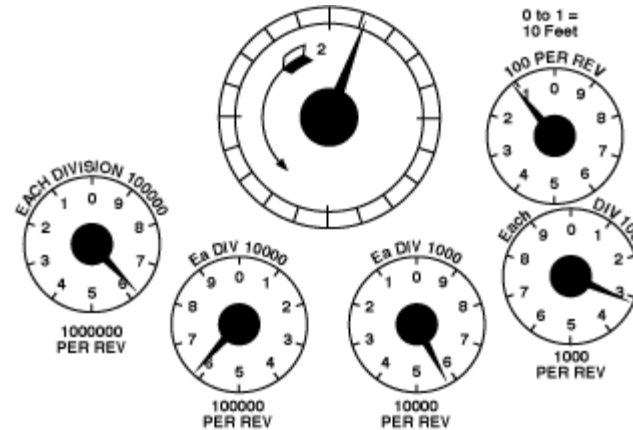

This meter is reading 18628

When you read your digital meter or your water meter

Your meter display may look like this…

6 6 5 3 1 0

You may also have a meter with dials that look like this….

But both of these readings are the same…
